FOR ALL THE PURPOSES OF A

FAMILY PHYSIC.

There has long existed a public demand for an effective jan ative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that demand, and an extensive trial of its writtes has conclusively shown with what success it accemplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medicies are immonious and irritating to the bowels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the low. Among the complaints which have been speedily eured by them, we may mention Liver Complaint, in its various forms of Janudice, Indigestion, Languor and Loss of Appetite, Listl sane s, Irritao ity, Blious Headache, Billous Fever, Fever and Acne, Pain in the Side and Loins; for, in truth, all these are but the consequence of d'esel a tion in the liver. As an aperient, they alfind prompt and sure relief in Costiveness, Pins, C lie, Dysentery, Ilumors, Scrofula and Sorvy, Clabs with soreness of the body, Ulcers and impurity of the blood; in short, any and every cass where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel, Erysipelas, Palpitation of the Heart, Pains in the Back, Stonech, and Side. They should be freely taken in the spring of the, ye THERE has long existed a public demand for an

stimulant action on the circulatory system, renovite to estrength of the body, and retore the wasted or diseased energies of the whole organism. Hence an occ. ional dose is advant geous, even though no strious drangement exists; but annecessary dosing should never be earried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a plysic is regulard campet be entire trated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer better purpose the nany thing which has bitherto been available to mankind. When their virtues are nince known, the public will no larger don the later medy to employ when in need of a cuthantic medicial.

Louis Kossuth.

We have often been struck with the peculiartties of this strange, notorious individual .--Ever since we knew of him we have never been able to determiniae whether he was sane or insane, a genuine lover of his country, or a splendid demagogue. In the opening of his career, when his country was struggling to be free when its strong arms and stout hearts were striking and beating for the preservation of their homes and friends, and he was their leader, we werds and those of his actions. The spirit which manifested itself in the terrible "high-falutin" of his proclamations and pronunciamentos and the imbedility of his proclamations and pronunciamentos and the imbedility of his proclamations and pronunciamentos and the imbedility of his proclamations are proceeded. That we most heartify approve and endorse the Nebraska and Kansas Bill, as embodying the letter and spirit of our Kadaral science, and a convincing vindica ion of greet principles, which show how wisely and sagaciously the administration of public affairs have been conducted. Never before was the value of a government to a free people more cloquently principles, which show how wisely and sagaciously the administration of public affairs have been conducted. Never before was the value of a government to a free people more cloquently portrayed. No above have been allowed to creep into the respective departments. words and those of his actions. The spirit which manifested itself in the terrible "high-falutin" of his proclamations and pronunciaments and the imbecility of his manner of carrying them out was discernable to the most casual observer. One would have supposed from reading the one that he was possessed of the courage and genins that could pull up mountains by the roots, and with comparative ease, hurl them with deadly force at the heads of gods; and fine to the sustaining the true principles of the been conducted. Never before was the value of a government to a free people in the country.

LINSDED CAKES.—Some time since we alluded to the high estimation in which the British farmers held oil-cake as food for stock, particularly for fattening beel and mutton, while its importance has beeu almos entirely overlooked by our own farmers. Until the present season the sale of oil-cake in this market, for home consumption, has not exceeded 40 or 50 tons a year, and this has been principally fed by dairymen of foreign education.

We are pleased to learn that our farmers are now beginning to appreciate its value. The sales at the mill in this city the present season, sales at the mill in this city the present season, we are informed, average 2½ tons a day. It is chiefly bought by the enterprising farmers of Fayette, Bourbon, Woodford, and Scott counties, some of whom have taken 10, 20, and 30 tons each; others have bought in smaller quantities by way of experiment. It is the most concentrated and nutritious of all the kinds of food. Not more than from 2 to 4 lbs. should be given to each head of cattle a day, and this should to each head of cattle a day, and this should be mixed with the meal and other grain and be thoroughly incorporated with cut hay or straw. skin, and gives the coat a fine, sleek appearance, while it fattens must rapidly. The supply of beef cattle in the United States is constantly falling off, and hence prices must rule high, for a long time to come; and, while oil cake can be bought for one-quarter or one-third the price it will bring in England, it is folly to suffer it to go to feed British cattle and to earich British soil.

Wheat bran has long been a favorite food for stock with many. It is now selling at about \$30 per ton, while its comparative value is not one-tenth that of oil-cake. As a general article of food, Boussingault estimates nine pounds of

one-tenth that of oil-cake. As a general article of food, Boussingault estimates nine pounds of bran only equal to ten pounds of prime hay.—
With the present improvements in flouring mills the bran is but little more than the outer membrane of the wheat. It is valuable, however, at certain times, when fed to horses and other animals, on account of the lexative effect it produces. It also contains a large amount of bone duces. It also contains a large amount of bone earth, which renders it valuable for milch cows and calves; but used as it frequently is, about cities and towns, as almost the exclusive food for cows, it is the least economical of any kind of fodder .- Lou. CERTIFIED TO BY DR. WILSTACH. LAPAYRETE, IND., Feb. 21, 1854.

This is to certify that for the last five years of make I have been severely afflicted with Licer Com placar. To describe all of my horrible feelings woul be ont of my power. I was troubled with a severe de-pain in my left sede, with sharp pains under my shou der blade. My sleep was disturbed, unrelreshing, ac n mpanied by night-mare. After eating, I had seven the adjustment of any one of them.

J. D. Park—Dear Sir—H. 18 with great pleash e write about the very happy effects of your 'Dr Grisott's Extract of Yellow Rock and Sarsaparilla, inpoliny daughter, who has been suffering under that dreaful disease of Erystpelas, with which she was attacked in 1848, and she was attacked by some of our most skil full physicians for over eight months perseverinely, without any beneficial effect winterver. She became reduced to a perfect skeleion. She had ulcers from her shoulder to her knees, which continually discharged offessive matter. Her physicians pronounced her ease hopess, and beyond the reach of medicine. My neighbour and myself though the reach of medicine. My neighbours sive matter. Her physicians bronounced her ease hopess, and beyond the reach of medicine. My neighbours and myself though the reducing form of my neighbours missted on my trying 'Dr. Guysot Extract of Yellow Bock and Sarsaparilla,' as a test sort, for as all of our physicians had given her up, the could be no detriment in it. I consented to do so mo from restless desire te do something for my daught while life lasted, than from any hope of her getting the form restless desire ted os something for my daught while life lasted, than from any hope of her getting the fer lasted, than from any hope of her getting the form of my my similar disease.

Just Schlam and her of Yellow Dock and Sacapar la, which restored her in perfect health.

I most carnestly recommend it to every person st fering under any similar disease.

Ymris truly,

I do hereby certify, that my father's statement of m late illness is not by any means exaggerated. My health now perfect, which I ascribe wholly to the use for the Guysott's Extract of Vellow Dock and Sacanparila, "ANN n. MaRTIN.
